ABOUT COMPANY

PT Pradipa Muda Nusantara is an Indonesia based company focused on producing and exporting premium quality coconut shell briquettes. Originating from the land of abundant coconuts and community spirit, we deliver eco friendly, efficient, and sustainable energy solutions to the world.

We believe Indonesia is not only the world's top coconut producer but also a source of inspiration for high-quality and value-driven products. By combining natural heritage with innovation, we are committed to bridging local resources with global needs

VISION AND MISSION

• VISION

Is to become a symbol of clean energy solutions from Indonesia that connects natural resources with the welfare of local communities and the needs of the world.

• MISSION

1. Producing superior briquettes in terms of quality, efficiency, and desirability.
2. Raising the potential of Indonesian coconut as a high-value export commodity.
3. Preserving nature by utilizing coconut shell waste responsibly.
4. Increasing Indonesia's competitiveness in the global alternative energy market.
5. Building a distribution network that reaches local and international markets

OUR COMMITMENT

At PT Pradipa Muda Nusantara, we are driven by a strong dedication to delivering value–both to our global partners and to the communities we work with. Our commitments are built on five key pillars:

Quality

We are committed to producing premium coconut shell briquettes that meet the highest international standards in terms of performance, durability, and cleanliness.

Sustainability

By utilizing coconut shell waste, we turn natural byproducts into valuable clean energy—minimizing environmental impact and promoting responsible production practices.

Innovation

We continuously seek new ways to improve our products and processes, blending Indonesia's natural richness with modern technology and global market insight.

Integrity

We uphold transparency, honesty, and ethical business practices in all of our operations—ensuring trust and accountability in every partnership.

Global Reach, Local Pride

We proudly represent Indonesia on the global stage, connecting local natural resources with international demand through trusted distribution.

PRODUCTION FLOW BRIQUETTES

PT Pradipa Muda Nusantara

1 RAW MATERIAL SELECTION

We use only high quality, fully matured coconut shells that have been naturally sun-dried.

2 CARBONIZATION

The coconut shells are burned in a specialized low-oxygen kiln (pyrolysis) to produce high-quality pure charcoal.

3 CRUSHING & SCREENING

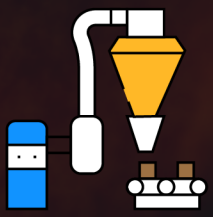
The resulting charcoal is crushed into fine powder and screened to separate coarse particles.

4 MIXING & BINDING

The charcoal powder is mixed with natural binders (such as tapioca) and water to form a dough like mixture ready for molding.

5 BRIQUETTING & DRYING

The mixture is shaped into briquettes (cube or hexagonal) and dried in a controlled-temperature oven to reduce moisture content.



6 PACKING & QUALITY CHECK

After passing quality control tests (moisture, ash content, burning duration), the briquettes are packed in kraft cartons and prepared for export.

OUR PRODUCT

Shisha Premium Coconut Shell Briquettes

We specialize in the production and export of premium coconut shell briquettes, with a core focus on shisha-grade briquettes known for their clean burn, long-lasting heat, and minimal ash. Our products are made from carefully selected, high-quality coconut shells, ensuring consistent performance and customer satisfaction.

Examples of coconut shell briquette shapes:
